

UC DAVIS ATHLETICS

CEI Presentation

Council on Student Affairs & Fees

January 12, 2024

Sean Quinn, Athletics CFO

Danielle Shank, Sr. Associate AD External Relations

Overview of CEI

CEI – Background & Purpose

- Approved in 2002 to support UC Davis' move from Division II to Division I athletics.
- Supports Athletics Grant-in-Aid (scholarships) to the level allowed by the NCAA.
- CEI was largely supposed to fully support GIA but after tuition increases in 2009-10, other funds were needed to support GIA.

Overview of Grant-in-Aid

*The NCAA allows institutions to award funds to student-athletes based on financial need and athletic contributions to the team.

*The NCAA limits both the number of scholarships by sport and the amount awarded.

*The number of scholarships varies by sport, as determined by the NCAA. Scholarships in most sports can be split across multiple student-athletes.

*Title IX requires that scholarship allocations for men/women be proportional to the number of student-athletes.

Overview of CEI Revenues and Expenses

CEI does not cover all the costs of scholarships:

	FY20	FY21	FY22	FY23	FY24 (projected)
Sources					
CEI	\$7,370,935	\$7,498,517	\$7,613,636	\$7,597,852	\$7,709,000
Uses					
Grant in Aid	\$8,343,423	\$8,880,911	\$8,301,015	\$8,875,403	\$9,488,289
Net	(\$972,488)	(\$1,382,394)	(\$687,379)	(\$1,277,551)	(\$1,779,289)
% GIA covered by CEI	88%	84%	92%	86%	81%

Since CEI does not cover ICA's GIA expense, other fund sources are needed to support GIA including gifts and endowments, institutional support, and NCAA revenues.

As tuition/fees/housing costs increase, an even larger gap between CEI funds and GIA expense will exist.

CPI Adjustment Impact

CPI Adjustment:

- Will allow ICA to maintain and enhance Title IX gender equity measures
- Ensures compliance with Big West scholarship policy (many programs must be funded to at least 80% of NCAA maximum)
- Provides the best opportunity for competitive success

No CPI Adjustment:

- Increases the need to find significant new scholarship funding sources – endowment spendable balance is 4% annual
- Places a strain on expense categories including already lean operating budgets, staffing levels, support services, and more
- Could lead to scholarship budget reductions for sport programs (impacting future student-athletes)

Peer Comparison

NCAA Division I Institutions w/football:

School	Scholarship Expense	# Sports	# Students On Aid
New Mexico	\$8,402,834	18	357
Albany	\$8,375,566	18	374
Stony Brook	\$8,367,833	18	345
Buffalo	\$8,341,717	16	317
Towson	\$8,329,889	19	399
UC Davis	\$8,301,015	25	469

**Source: NCAA Financial Reporting System 2021-22*

Among institutions spending \$8.3M to \$8.4M in athletic scholarships, UC Davis is supporting **more** student-athletes across **more** sports. UC Davis provides an average of **32% more** student-athletes with GIA compared to these schools.

On average, each UC Davis student on athletic aid receives a **46% scholarship**.
