

COSAF Comments

Student Activities and Services Initiative (SASI)

COSAF Meeting: December 4, 2020

Campus Recreation

Great that Campus Recreation adopted virtual methods to maintain student engagement with their events. Also great that they are looking into the future and already considering what virtual events they can keep holding after COVID-19.

I appreciate how Campus Recreation still has so many students employed during this pandemic. Having a steady source of income is crucial for maintaining basic resources at this time.

Great job adapting the services to a virtual environment and helping keeping our campus safe and healthy!

It wasn't clear what the additional Facility/Maintenance funding would go to if the ARC is closed. It isn't clear how increased maintenance would be used in a closed facility.

Campus Recreation is using the SASI fees well.

I appreciate how they have become available to students and provide resources virtually.

The Campus Recreation presentation and the use of the SASI fees were understandable and easy to read. I do not have any other comments regarding Campus Rec. and the SASI fee uses. Thank you for the presentation.

I am super appreciative of Campus Rec finding ways to provide activities virtually to students as I believe they play a significant role in strengthening the mental health of students. Thank you!

I thought they did a good job with the transition to remote services. Very informative presentation.

It was very informative and the way the presentations described the SASI fee and Campus Rec, made it easy to understand. Thank you.

Love what y'all are doing to continue supporting students!
